

Line for mixing and dosing of dry goods

Professional technological systems for the food and chemical industries

Application:

Line finds application in food and chemical industries e.g. for pastry mix production, production of cakes, and also production of powders, capsules etc.

Description:

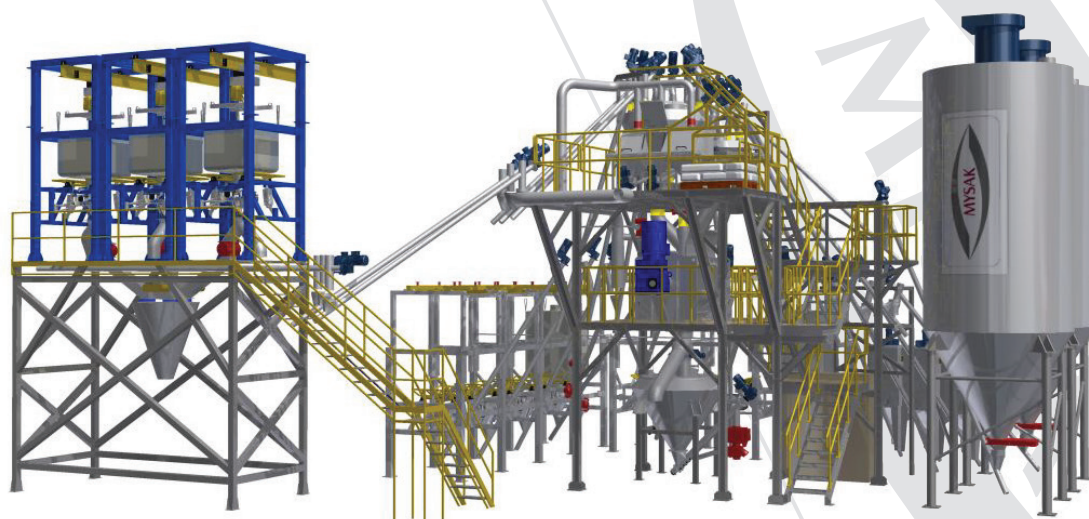

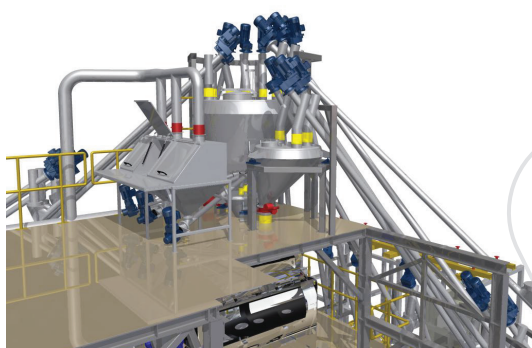

Line for mixing and dosing of dry goods is designed for raw material unloading, dosing to the weighing tank, mixing, storing and transporting with an appropriate efficiency to the next technological process..

Technical specification*

Installation of dosing and mixing the powders makes one complete technological system which consists of:

- Big-Bag unloading station
- Bags un-bagging station
- Main raw materials dosing system
- Micro-additions dosing station
- Raw materials weighing system
- Mixers
- Separator
- Buffer tank
- Screw conveyor and bucket conveyor

*Technological parameters, device configuration and construction is individually adjusted to the needs of a customer.

Offered devices can differ from the ones presented in the pictures
